Viega Frames for Wall Hung Sanitaryware

Choosing a wall hung sanitaryware option can maximise the style of your Catalano bathroom. In addition to opening up more opportunities for design it can be of great benefit when space is a premium, as well as hiding away unsightly plumbing and making cleaning much easier as sanitaryware is raised above the floor.

The frames can be simply bolted to the floor and placed within walls and as they are designed to support over 400kg (60 stone), you can have absolute confidence in your wall hung installation. Speak to your retailer for further details.
